#### Metamark (UK) Limited

Metamark House, Octimum Business Park, Forsyth Road, Woking, GU21 5SF  
Luneside, New Quay Road, Lancaster, LA1 5QP

Warranty: Metamark (UK) Limited warrants to its customers that completed decorative markings which utilise Metamark Colour Change Wrapping Film will remain in good condition without excessive fading or colour degradation for the specified life time of each material when correctly stored and applied in accordance with procedures outlined in the technical literature. If within the specified years of normal use Metamark Colour Change Wrapping Film becomes ineffective for its intended use, then Metamark will provide sufficient material to produce a new replacement marking, and will also, at its own discretion, contribute an allowance towards the costs involved in replacing the graphics.

Vehicle Wrapping Solutions

## MM-CCG SERIES

### Cylinder Cast Wrapping Film with MetaGlide®

#### Features

**MM-CCG SERIES** is a proven and highly effective full, or partial, vehicle wrap solution. Enabling a vehicle colour change without under-going expensive resprays.

**MM-CCG SERIES** is a 100 micron durable film that helps transform and customise a range of vehicles, including fleet and commercial, with high abrasion resistant film. Conforming to all vehicle lines, curves, rivets and corrugations providing a flawless finish.

**MM-CCG SERIES** provides a non-permanent wrap solution with adhesive that offers a clean and trouble-free application, and minimal residue on removal.

**MM-CCG SERIES** is available in a range of colours, and special colour matches can be offered for projects such as fleet branding.

#### Adhesive Technology

**MM-CCG SERIES** meets the needs of today's professional installers by ensuring trouble-free application from the MetaGlide® next generation air release system.

The MetaGlide® micro-channel adhesive offers both enhanced repositionability and a high final adhesion. This allows quicker and easier installation particularly on larger panels, and the assurance on full 3D wraps and channels.

MetaGlide® offers an enhanced layflat performance as prints stay stored or rolled without tunnelling or delamination.
